

High-pressure pump control

Example of a high-pressure pump control

- High-pressure pump control for CANbus, conventional and electric motors
- Control of a high-pressure system with up to five consumers
- Remote diagnostics over GSM
- Setting of parameters and error reading using ehb programming tools
- High pressure control up to 5000 bar
- Flexible input circuitry, digital or analogue
- Graphic display 116 x 68mm, 240 x 128 pixels with backlight
- Housing protection class IP67
